

May 2014

We were looking for an alternative to costly shipping charges to move our Industrial 1600 pound Turbo-mister Evaporator from trade show to trade show. We contacted Sid at Sandback Technical services and were thrilled to find out he could replicate a 1/8<sup>th</sup> scale model of our machine. The company delivered a fantastic model of our product on time and on budget. Everyone is very impressed with the amount of details and the almost mirror image that we received. That said we are very happy we contracted Sandback to do this job for us. I would recommend them to anyone for their innovative and state of the art forward thinking.

Sincerely

**Slimline Manufacturing Ltd.**  
**Producer of Turbomist and Turbo-mister**
